

Jewellery Party Bead Kit

This kit contains memory wire, elastic, cotton cord, a selection of beads, pliers, clasps, a reusable bead storage box and paper bowls.

Memory wire is a unique material that looks a lot like a spring. It's often made of stainless steel so that it does not rust. An advantage to jewellery made with memory wire is that you don't have to worry about what size to make. It's very easy to put on and take off. The elastic and cord can be tied to any length and are strong and durable.

Instructions for memory wire Bracelets /Necklaces:

1. Choose and thread your selection of beads leaving 1 cm at the end.
2. Use the pliers to make a loop in the end of the wire, making sure that it fits comfortably around the wrist and that there are no sharp edges.

For a memory wire necklace the same applies. A screw clasp is included for these necklaces in case heavy beads are used. They can be linked to the loops in the ends of the wire. You can bend one end before you start, this makes it easier for younger children.

Instructions for elastic and cotton cord:

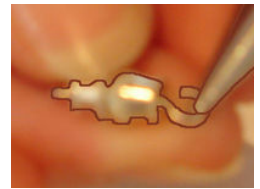

Tie the elastic in a double knot looping it through twice on the second knot and pull firmly, test to check the knot is holding if in doubt just do a few more knots.

The cotton can be tied in a bow or a slip knot (tie each end around the other, tricky but then the length can be adjusted).

Memory wire can be sharp. Adult supervision is required at all times, the wire in this kit is cut to size.

Do not attempt to cut the memory wire.

Due to small parts not suitable for under 3 years of age.
Recommended age 6 +
